

Module 1: Introduction to Azure DevOps

Demo - 2

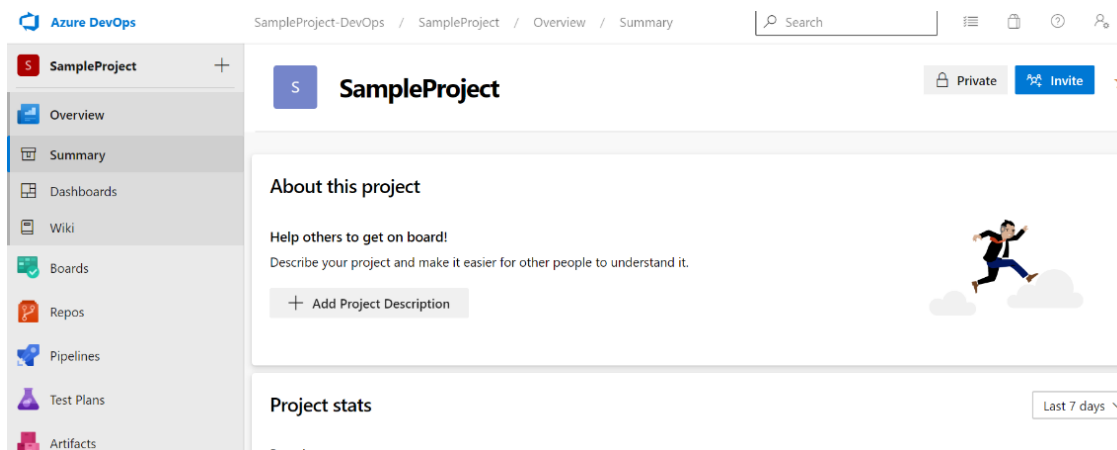

Demo 2: Azure Boards – Agile Planning and Portfolio Management

Problem Statement: Create an Azure board to track the work items, epic, user stories across sprint.

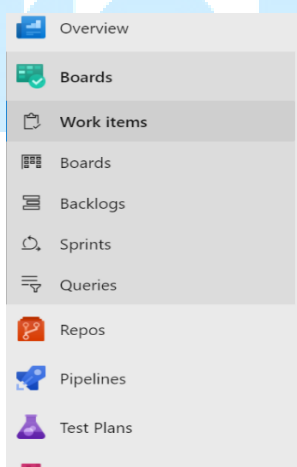

Solution:

Step 1: Open the Azure DevOps URL: <https://dev.azure.com/>

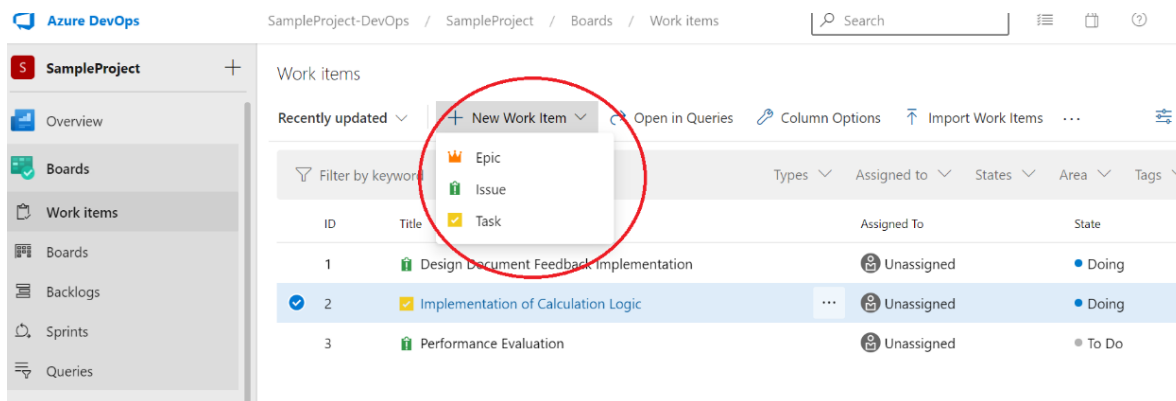

Step 2: Go to the project for which the user wants to create Azure Board.

Step 3: Click on the Boards section at the left side menu.

Step 4: New Work item can be created as shown below:

Step 5: Create three work items: Epic, Issue, or Task, as shown below.

| Filter by keyword | | | | | | Types | Assigned to | States | Area | Tags | X |
|-------------------|---|--|-------------|--|-------|-------|-------------|--------|------|------|---|
| ID | Title | | Assigned To | | State | | Area Path | | | | |
| 1 | Design Document Feedback Implementation | | Unassigned | | Doing | | SampleProje | | | | |
| 3 | Performance Evaluation | | Unassigned | | To Do | | SampleProje | | | | |
| 2 | Implementation of Calculation Logic | | Unassigned | | To Do | | SampleProje | | | | |

Step 6: Click on the board. These three items will be shown as below:

Only the issues are shown as the issues are selected in the filter. The board shows all the work items along with their status and progress. If we want to see a sprint-wise task, then click on the Sprints section in the left section.

edureka!
